Converting a GeoJson to a Shapefile

1. Download and install Notepad++, a text editor

2. Open your GeoJson in Notepad++

3. Copy the text that appears

4. Go to http://ogre.adc4gis.com/

5. On the right side you'll see an option for "Convert from GeoJson"

6. Paste the text in the "GEOJSON" text space

7. Give your file a name in the "Output Name" text space

8. Click "Convert to Shapefile"

9. Your file will download to your Downloads folder
